RE: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

Dear Ms. Dortch,

It is my understanding from the GPS manufactures that we deal with on a daily basis that the proposed plan by LightSquared will adversely affect the performance of the High-Precision GPS equipment that is used by thousands of land surveyors like myself. It is vital that our GPS systems that are used everyday to build roads, bridges, and other infrastructure, work correctly.

It is my understanding that LightSquared has ignored the independent test results that confirm that their proposed system will do just that.

I firmly oppose LightSquared's request to affirm their license to move forward with their plan until it is absolutely known that their, or anyone else's proposed system, will not adversely affect the High Precision GPS user community. The potential consequences of this happening are unimaginable. Were talking about a Billion dollar industry that they could disrupt.

We absolutely cannot let that happen.

Sincerely,

Kevin Steele, PLS
